ROMELLE DOMINGO

Principal Product Designer, Digital Modernization of Enterprise-Ready Systems
Contact: romelle@rml360.com | 702-608-4065 | Location: Los Angeles Metro Area, CA
Portfolio: www.rml360.com | LinkedIn: www.linkedin.com/in/somecallmenyce

PROFESSIONAL SUMMARY

Senior Staff Product Designer with 7+ years of experience leading enterprise platform design across complex, multi-system environments. Specializes in transforming ambiguous problem spaces into scalable, insight-driven product solutions that support decision-making at scale. Proven track record designing workflows for enterprise platforms, integrating AI-assisted experiences, and enabling cross-functional teams to operationalize research, data, and user insights. Brings strong systems thinking, design leadership, and execution across end-to-end product ecosystems, with a focus on usability, adoption, and measurable impact.

CORE SKILLS

- AI-Native Product Design
- Research & Insights Platforms
- Enterprise Workflow Design
- Systems Thinking & Platform Architecture
- UX Research & Insight Synthesis
- Data-Informed Product Design
- Design Systems & Scalable Frameworks
- Cross-Functional Product Development
- Rapid Prototyping (Vibe Coding + Figma)
- End-to-End Product Execution

PROFESSIONAL EXPERIENCE

Principal Product Designer – Dell Technologies | Round Rock, TX (Remote) | Jan 2021 – Feb 2026

- Accomplished scalable enterprise configuration workflows as measured by increased product sales and adoption, by designing intelligently-guided, system-level experiences across sales Configure, Price, Quote, Order ecosystems
- Accomplished a 33% reduction in configuration errors and support tickets by redesigning validation systems and embedding AI-guided decision support into high-stakes processes
- Accomplished improved decision efficiency as measured by 18% reduction in time-on-task, by reducing cognitive load index by 65% through simplified interaction models and clearer system feedback
- Accomplished a 22% increase in customer satisfaction score by conducting research-driven design iterations and improving transparency in AI-assisted recommendations
- Accomplished stronger product-engineering alignment as measured by streamlined delivery of feature updates, by partnering with senior leaders to shape roadmap and technical strategy
- Accomplished cohesive integration of complex product data as measured by reduced workflow friction, by facilitating cross-functional workshops and aligning system architecture across teams
- Accomplished expansion of design system capabilities as measured by support for AI-driven workflows and reduced pattern fragmentation, by extending reusable components and interaction patterns to accommodate AI-guided configuration experiences

Product Designer - Zynx Health | Part-Time, Remote | Jan 2023 - May 2024
Clinical Based Plan of Care Platform

- Accomplished the design of a clinical, evidence-based care platform by translating complex care protocols into intuitive, workflow-driven experiences, resulting in improved usability for clinicians and care teams
- Accomplished a scalable design system from zero to one by building/documenting reusable components, interactions and patterns using Tailwind CSS, resulting in greater design consistency and faster development.
- Accomplished faster product delivery across core workflows by aligning design and engineering through shared system architecture, resulting in reduced design-to-development friction
- Accomplished effective clinical workflows by structuring decision pathways into user-centered interaction models, resulting in clearer and more actionable user experiences

Senior Staff UX/UI Designer – Monster Energy | Corona, CA | Aug 2019 – Oct 2020

- Accomplished a 20% increase in engagement in emerging markets by leading end-to-end product initiatives across digital platforms and internal sales tools
- Accomplished 50%+ improvement in development efficiency by building and scaling a unified design system across teams and platforms
- Accomplished a 35% increase in design throughput by creating standardized intake frameworks and optimizing team workflows
- Accomplished improved cross-functional alignment as measured by higher social engagement and brand consistency, by facilitating workshops across marketing, product, and engineering

Staff UX/UI Designer – Monster Energy | Corona, CA | Aug 2016 – Oct 2019

- Accomplished a 23% increase in engagement and 12% growth in page views by leading user experience design and experimentation initiatives, resulting in stronger digital performance and user retention
- Accomplished more effective conversion rates by conducting contextual studies and A/B experimentation, resulting in data-driven improvements to e-commerce checkouts
- Accomplished a greater than 60% Meeting-to-Opportunity ratio for field sales managers including cost reduction and user growth by delivering optimized digital experiences, resulting in 20% win rate from opportunities

EDUCATION

Bachelor of Science – Web Design & Development
DeVry University, Sherman Oaks, CA

Bachelor of Science – Visual Communication
Weber State University, Ogden, UT
