

Romelle Domingo

Senior Product Designer · Enterprise Platforms · Systems Thinking

romelle@rml360.com | 702.608.4065 | www.rml360.com | linkedin.com/in/somecallmenyce

PROFESSIONAL SUMMARY

Product design leader focused on shaping product strategy and delivering scalable, human-centered experiences across enterprise and AI-powered platforms. Excel at leading cross-functional teams through ambiguity, aligning business objectives with user needs, and driving end-to-end product execution from discovery through delivery. Bring a systems-thinking approach to design systems, interaction design, research, and product innovation while fostering collaboration across design, engineering, and product organizations. Passionate about building intuitive, accessible experiences that solve complex problems and create lasting business impact.

CORE EXPERTISE

UX Design & Craft: Information Architecture · Interaction Design (Web, Mobile & Tablet) · Visual Design · Wireframing · High-Fidelity Mockups · Prototyping (Figma, Figma Make) · Storyboards & User Flows

Research & Iteration: User Research & Usability Testing · A/B Testing & Analytics · Lean UX & Agile Methodologies · Outcome-Centered Design · Journey Mapping · Accessibility Standards

Collaboration & Systems: Design Systems · Cross-Functional Partnerships · Stakeholder Communication · Design Critique & Facilitation · Front-End Design Awareness · Scalable Process Building

PROFESSIONAL EXPERIENCE

Product Design/UX Expert · Mercor · May 2026 – Present

AI Systems Consultant · Remote · San Francisco, CA

- Evaluated and annotated complex reasoning chains to enhance Large Language Model (LLM) accuracy in UX/UI Design, contributing to improved logic and factual reliability.
- Drafted high-complexity problem sets and gold-standard responses used to benchmark APEX-Agent performance against human expert baselines.
- Maintained a 92% quality accuracy score across RLHF (Reinforcement Learning from Human Feedback) tasks, consistently exceeding the platform's strict evaluation thresholds.
- Collaborated with AI researchers to identify model hallucinations and reasoning failures, directly improving model performance in design tasks.

Sr. Staff Product Designer · Dell Technologies · Jan 2021 – Feb 2026

Enterprise Workflow & AI-Enabled Product Systems · Remote · Round Rock, TX

- Reduced user errors and support tickets by 33% by redesigning end-to-end information architecture and user flows for a complex order management system, embedding transparent decision-support patterns that helped users act with confidence in high-stakes workflows.
- Cut user time-on-task by 18% as measured by task-completion studies, by simplifying interaction models across web and mobile, lowering cognitive load index 65% through progressive disclosure, clearer system feedback, and accessibility-aligned visual hierarchy.

- Raised customer satisfaction scores by 22% by conducting iterative user research and usability testing cycles, aligning AI-assisted recommendations with real user mental models and building explainability into the experience.
- Evolved enterprise design system components to support new interaction paradigms (prompt inputs, feedback loops, confidence indicators), reducing pattern fragmentation across 10+ product teams and enabling consistent, scalable UI across web and tablet.
- Partnered with PMs, engineers, and UX researchers in Agile sprints to define scope, prioritize features, translate product requirements into interaction specs, and deliver implementation-ready designs on tight timelines.

UX/UI Designer (Contractor, Part-Time while at Dell) · Zynx Health Jan 2023 – May 2024

Clinical-Based Plan of Care Platform · Remote · San Francisco, CA

- Translated complex clinical care protocols into intuitive, workflow-driven experiences, enabling clinicians to manage evidence-based plans of care more efficiently.
- Architected a foundational zero-to-one design system using Tailwind CSS, improving design consistency and reducing design-to-development friction by 40% across core workflows.
- Incorporated healthcare compliance and HIPAA requirements into interaction patterns, ensuring all data displays and clinical pathways met stringent industry standards.
- Facilitated cross-functional workshops with clinical SMEs and Engineering, resulting in a unified product vision that aligned technical constraints with user needs.

Sr. Staff UX/UI Designer · Monster Energy · Aug 2019 – Oct 2020

Brand Marketing Experiences & Internal Sales Tools · Corona, CA

- Drove a 20% lift in user engagement across emerging markets by leading end-to-end UX for consumer-facing web and mobile platforms, owning design from problem framing through delivery.
- Increased development efficiency by 50%+ by building and scaling a unified design system, establishing reusable components, interaction standards, and accessibility guidelines across teams and platforms.
- Grew design team throughput by 35% by creating standardized intake frameworks and repeatable design processes, reducing time-to-delivery on feature cycles.

Staff UX/UI Designer · Monster Energy · Apr 2016 – Oct 2019

E-Commerce & Brand Marketing Experiences · Corona, CA

- Increased user engagement by 23% and page views by 12% by leading interaction design experimentation across web and mobile, combining A/B testing, usability research, and iterative prototyping to validate and ship data-driven design improvements.
- Improved e-commerce checkout conversion through contextual user research and A/B testing, translating analytics into design changes that directly improved funnel performance.
- Achieved +60% Meeting-to-Opportunity ratio for field sales teams by delivering optimized digital experiences across mobile and tablet, contributing to a 20% win rate improvement from qualified opportunities.

EDUCATION

B.S. Web Design & Development · DeVry University, Sherman Oaks, CA · 2011–2014

B.S. Visual Communication · Weber State University, Ogden, UT · 2000–2005
